Past Performance

Army, Burn Institute Surgical Research Registered Nurses

Provide nursing services of 13 FTE Registered Nurses at San Antonio DoD MTFs and the Institute of Surgical Research (ISR) located at Brooke Army Medical Center (BAMC), Fort Sam Houston, Texas. The BAMC ISR is the only Burn Center in the DoD that provides state of the art burn, trauma and critical care to injured war fighters and DoD beneficiaries around the world.

Air Force Invisible Wounds Interim Medical Review Panel Services

Provides a centralized Interim Medical Review Panel (IMRP) to ensure that Total Force Airmen recognized as meeting specific IW criteria and who are pending entry into the Integrated Disability Evaluation System (IDES) process have been properly diagnosed, treated, and given an adequate course of therapy for IW conditions prior to referral to the Informal Physical Evaluation board (IPEDB).

USAF Wilford Hall, Endocrinology Diabetes Center of Excellence

Provides Ancillary Medical Service Providers at the Wilford Hall Ambulatory Surgical Center. The team provides subject matter expertise supporting Health Care practitioners (HCPs) at nationwide Air Force Military Treatment Facilities (MTFs) that care for over 50,000 active duty AF service members, retirees, and their family members with diabetes.

Air Force, Air Force Centralized Credentials Verification Office (AFCCVO)

Provides a turn-key operation for credentialing support to the Air Force Medical Service (AFMS) by gathering required credentials, performing Primary Source Verification (PSV) of applicable credentials, conducting databank queries, and entering all data into the Centralized Credentials Quality Assurance System (CCQAS).

Army, Joint Biological Agent Identification and Diagnostic System (JBAIDS) Provides support and training services for the JBAIDS and Next Generation Diagnostic Systems (NGDS) and, Common Analytical Laboratory System (CALs) Training Programs, and any related programs under the auspices of Molecular Diagnostics Branch, Academy of Health Sciences (AHS), U.S. Army Medical Dept. Center & School (AMEDDC&S).

Past Performance

Center for Disease Control (CDC) TECPHI-GHWIC

Bestica was awarded this contract by The National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP) the purpose of this initiative is to increase the capacity of Tribal Epidemiology Centers (TEC) to deliver public health functions to and with the tribes/villages in their Indian Health Service (IHS) Area (including the tribal community). The awards will contribute to reductions in chronic diseases and risk factors, in health outcomes, and improvements in overall health by building public health capacity and infrastructure in Indian Country for disease surveillance, epidemiology, prevention and control of disease, injury, or disability, and program monitoring and evaluation.

USAF Wilford Hall, Medical Evaluation Board (MEB)

Provides Physician Assistant (PA), Nurse Practitioner (NP) and Physical Evaluation Board Liaison Officer (PEBLO) that provide occupational medical evaluations of military members with psychiatric problems and/or who are undergoing MEB or Temporary Disability Retired List (TDRL) actions.

United States Army (USA), Medical Command (MEDCOM) Medical Records Technicians (MRT)

Provided Medical Records Technicians to support administrative services in the Emergency Medicine Operation at Brooke Army Medical Center. The mission of the United States Army (USA) Medical Command (MEDCOM) is to provide quality healthcare to its beneficiaries who include Active Duty, Reserve, National Guard and Retired Soldiers and their Family Members. In support of this mission, BAMC requires administrative support services in all direct and non-direct patient care and health-care related settings. BAMC is located within the San Antonio geographical area. BAMC is a modern state-of-the-art, 450-bed health care facility that provides level-one trauma and graduate medical education. The multi-storied medical treatment facility has 1.5 million square feet of operational space and a normal bed capacity of 450, of which 48 are ICU beds and 40 are dedicated to the Institute of Surgical Research Burn Unit.

United States Army (USA) Medical Training Education and Training Campus (METC) Diagnostic Medical Ultrasound Instructor

The DMS Program provides education and training in the major disciplines of: Ultrasound Physics, Sonography of the Abdomen, Small Parts Sonography, Basic Vascular Sonography, Sonography of the Pelvis, and Obstetrical Sonography. The instructional design for the DMS Program courses is group-lock step. The program consists of lectures, group activities, demonstrations, hands-on instruction and clinical practice; instruction may include computer-based or blended learning options. Practical exercises, computerized and written examinations. Written exams and practical exercises are used to assess knowledge and skills. The goal of the DMS program is to prepare graduates to perform basic clinical diagnosis and facilitate patient care in a health care setting through the practice of medical Sonography (Ultrasound). Through didactic courses, practical exams, and clinical experience; students will acquire the professional, ethical and technical skills required of sonographers in fixed and deployable medical facilities.

*Our Past Performance reflects Bestica's dedication to our customers.
We provide the right people, expertise, and solutions so you can continue with your mission.*
